

2025 TRC Disbursal for 2026 Funds Transaction Metadata

Overview of Disbursal Action:

Early, always-on treasury withdrawal governance actions, outside of the Intersect facilitated 2026 process, are pointed towards the Intersect Administration 2025 Treasury Reserve Contract (TRC). The governance actions specify the stake address associated with this instance as the withdrawal address for treasury funds.

This disbursal action moves DRep approved 2026 funds from the 2025 TRC instance into Intersect custody to allow transformation into the vendor selected preferred assets such as USDCx and USDM.

As part of the ongoing management of treasury funds and as part of the 2026 budget cycle a new 2026 TRC instance has been created:

Addr1x84sdxt6jjennmstphgdu7l7c2scf5d02a6cve2dgn5s2k8tq6vh499n88hqkrwsmea
las4psng674m4sej5638fq4vqmxs59w

This is required in order to update the permission set, oversight committee, maximums and expiry parameters associated with the TRC instance.

Once the final assets types are available funds will be moved to this 2026 TRC instance for ongoing transparency and milestone management under Intersects Administration.

Due to the volume and nature of the final assets it is not possible to predetermine the date funds will be returned to the 2026 TRC instance.

Proposal Values:

Cardano Vision 2026: Human Centred, Scalable, Post Quantum Secure – IO Research

£32,916,000

Cardano Critical Integrations V2

£23,000,000

Total Disbursal value: £55,916,000
